## Fireclay Block For Glass Kiln Pond Bottom

### 1, Main technical parameters of Fireclay Block For Glass Kiln Pond Bottom

ITEM	UNIT	TECHNCIAL INDEX
Al <sub>2</sub> O <sub>3</sub>	%	≥43
Fe <sub>2</sub> O <sub>3</sub>	%	≤1.5
R <sub>2</sub> O	%	≤1.0
Density	g/cm <sup>3</sup>	≥2.30
Porosity	%	≤18
Cold crushing strength	Mpa	≥50
Refractoriness	°C	1750
Refractoriness under load	°C	≥1400
Linear rate of change 1400°C*2h	%	±0.1

### 2,Brief introduction of Fireclay Block For Glass Kiln Pond Bottom

Brief introduction: the improved fireclay block supplied by our company is mainly made of special refractory castable, which is produced by using large-scale plate vibration table and vibration molding. The physical and chemical indexes of the product are superior and the overall dimensions are accurate. The improved products are superior to the traditional mud casting products in the corrosion resistance and alkaline corrosion resistance of the glass liquid. They are used to build the pool bottom and pool wall of the glass tank kiln, and have good application effect.

# ZIBO JINGGAN REFRACTORY IMPORT AND EXPORT CO.,LTD

---

3, Features of Fireclay Block For Glass Kiln Pond Bottom

1) High purity and compactness

2) High strength, good alkaline resistance

3) Accurate product size, small gap after masonry, good structural integrity

4, Application: bottom of glass tank furnace, pool wall

5, Good feedback of product use effect, the products have been exported to South Korea, Russia, Pakistan

6, We are a professional supplier, who can provide customers with free product technology, use and other issues

Do you want to find a professional supplier of refractory products?

Do you want to find a professional supplier of graphite electrodes?

Do you want to find a stable and credible supplier?

Then let's contact with jinggan company
