2. Brief introduction: seamless steel tubes for boilers are used to manufacture high pressure and water pressure water pipes, including high-quality carbon steel, alloy steel and stainless heat-resistant steel.the type include 20G,20MnG , 25MnG , 15MoG,20MoG, 15CrMoG, 1Cr18Ni9, 1Cr18Ni11N6 and so on. These steel pipes work under

high temperature, high pressure and steam for a long time, which will cause oxidation and corrosion. Therefore, the steel pipes are required to have high endurance strength, high oxidation resistance and good structural stability

3, Standard No.: seamless steel pipe for high pressure boiler (GB5310-2008), seamless steel pipe for low and medium pressure boiler (GB3087-2008)

4, It is correct to choose our company; our company supplies various specifications and models of seamless steel pipes all the year round, with sufficient supply and complete specifications and models, which can be delivered in about 10 days. Dear customers, you need to purchase, please clearly state the product specification, model, use, product standard, purchase quantity in the email, so that I can accurately quote the preferential price to you

5. Good feedback of product use effect, the products have been exported to South Korea, Oman, Morocco

6. We are a professional supplier, who can provide customers with free product technology, use and other issues.

Do you want to find a professional supplier of refractory products?

Do you want to find a professional supplier of graphite electrodes?

Do you want to find a stable and credible supplier?

Then let's contact with jinggan company
